

ELEMIS

Intelligent SKINCARE

ULTRA SMART PRO-COLLAGEN

Preserve, promote and protect skin resilience for visibly transformative results.

Clinically
PROVEN

Specialised ALGAE

Pioneers in research and development of algae, ELEMIS has always recognised their remarkable properties and transformative skin benefits. Having utilised 34 different varieties of micro algae and seaweeds across all ranges, ELEMIS sourced the best of the best to create ULTRA SMART PRO-COLLAGEN, the pinnacle of innovation, ushering in a new age of intelligent skincare.

Algae are powerhouses of nutrition and intelligent adaptation. Naturally found in both freshwater and marine (saltwater) ecosystems, algae can thrive in extreme environments, from the glacial waters of the Arctic to the ultra-salinated Dead Sea. Thriving in a range of environments by producing compounds and secondary metabolites for chemical defense, including vitamins, minerals, amino acids and polysaccharides, algae is ideal for skin exposed to the constant influx of internal and external stressors that modern life presents.

These specialised algae, grown and cultivated for ELEMIS, target multiple signs of skin ageing. This diverse network of potent red, green and brown micro and macro algae, each with a specified role, help to promote, protect and preserve the foundations for resilient skin, while targeting stubborn deep set lines and wrinkles.

Targeted DELIVERY SYSTEMS

Where nature meets technology, cutting edge delivery systems encapsulate the actives, allowing them to perform at maximum efficacy. The active is precision-released slowly onto the skin, prolonging the skincare benefit and delivering the active exactly when and where it is needed.

NEW ULTRA SMART PRO-COLLAGEN

Intelligent, targeted skincare has arrived.

A bespoke range of skincare that preserves, promotes and protects skin resilience for visibly transformative results.

Unique Complexes

• ULTRA SMART ALGAE COMPLEX

This multi-faceted algae complex is our most effective yet. A powerhouse of 9 potent red, green and brown micro and macro marine and freshwater algae, each with a specified role, help target multiple signs of skin ageing. Skin looks firmer and feels intensely hydrated.

• ULTRA SMART DRONE PEPTIDE TECHNOLOGY

Developed using principles of drone navigation technology, this pioneering system cleverly targets specific areas of the skin to help deliver a boost of Hyaluronic Acid and restore the skin's balance. Skin appears smoother, hydrated and less crumpled.

• ULTRA SMART LINE FIGHTING COMPLEX

Designed to support the skin's natural collagen management to help keep the skin in optimum condition. Formulated with a blend of 3 potent algae and Orange African Bulbine, targeting the appearance of deep set lines and wrinkles, firmness and elasticity, for visibly transformative results.

NEW
ULTRA SMART PRO-COLLAGEN
EYE TREATMENT DUO

2 X 10ML | AED 900.00

This clinically proven† 24-hour eye treatment duo is formulated with ELEMIS' ULTRA SMART Pro-Collagen technologies and complexes to target the specific signs of ageing around the eyes.

The morning balm targets dark circles and reduces the appearance of under eye puffiness, while leaving the eye area looking brighter and rejuvenated. The evening cream helps to preserve the integrity of the skin to improve the appearance of deep set wrinkles, while improving the feeling of elasticity around the delicate eye contour.

Unique Complexes

• ULTRA SMART LINE FIGHTING COMPLEX

Designed to support the skin's natural collagen management to help keep the skin in optimum condition. Formulated with a blend of 3 potent algae and Orange African Bulbine, targeting the appearance of deep set lines and wrinkles, firmness and elasticity, for visibly transformative results.

• ULTRA SMART TRIPLE TARGETED DERMAL COMPLEX (MORNING EYE BALM)

A polysaccharide-dense complex, triple targeted to help reduce the appearance of undereye puffiness, target dark circles and provide a tightening effect on the skin.

• ULTRA SMART SLOW RELEASE DERMAL TECHNOLOGY (EVENING EYE CREAM)

This three-dimensional matrix of polysaccharides, releases a marine pentasaccharide to the skin as you sleep, helping to improve elasticity and reduce the appearance of wrinkles around the eye contour.
